Experience

Profcyma Global Solution, Pune

Feb 2026 – July 2026

React Native Developer Intern

- Developing cross-platform mobile applications using **React Native**, **JavaScript**, and reusable UI components.
- Integrating **REST APIs**, handling API data rendering, and implementing responsive mobile interfaces.
- Working with navigation, state management, debugging, and Git/GitHub workflows.

Passion Software Solution, Jalgaon

Jan 2025 – May 2025

Full Stack Web Developer Intern

- Developed full-stack applications using **Java**, **JSP**, **Servlets**, **HTML**, **CSS**, **Bootstrap**, and **MySQL**.
- Built modules for a **Hostel Management System** using **MVC architecture**.
- Integrated **Twilio API** for real-time SMS notifications and backend automation.

Projects

QuickMart — Full Stack E-Commerce Web Application

ReactJS — Spring Boot — Oracle SQL — JWT — REST API

- Developed a full-stack e-commerce platform using **ReactJS**, **Spring Boot**, and **Oracle SQL**.
- Built secure **REST APIs** for authentication, cart, products, and order management.
- Implemented **JWT Authentication** and integrated frontend/backend using Axios.

PM_Road — Cab Booking Mobile Application

React Native — JavaScript — REST API — Navigation

- Built a cab booking mobile application using **React Native** for seamless ride booking and management.
- Developed feature such as ride booking, pickup/drop selection, fare calculation, and trip history management.
- Integrated **REST APIs** for booking requests, driver data, and ride status handling.
- Implemented responsive UI, screen navigation, state management, and real-time user interactions.

Gee Cart — E-Commerce Mobile Application

React Native — JavaScript — REST API

- Built a feature-rich **e-commerce mobile application** using **React Native** for browsing products, managing carts, and placing orders.
- Developed product listing, category/subcategory navigation, product search, filtering, product variants, wishlist, and cart management features.
- Developed guest cart and user cart **synchronization**, allowing cart items to be retained and merged when users log in.
